

July 14, 2026

Dear Valued Customer,

We are aware of the recent reports of outbreaks of cyclosporiasis, a gastrointestinal illness caused by the microscopic parasite *Cyclospora*, in the United States. At this time, Bondi Produce has not been advised of any confirmed or potential food safety concerns associated with any of the products we supply.

Currently, no causal link to a specific growing region or type of produce has been identified as the cause of these outbreaks. Additionally, the Public Health Agency of Canada (PHAC) is not currently investigating any cyclosporiasis outbreaks in Canada.

At Bondi Produce, food safety remains our highest priority. We are committed to maintaining open communication with our customers and continue to work closely with our suppliers and regulatory agencies to ensure we receive timely information and respond promptly to any identified food safety concerns.

If you have any questions or require additional information, please do not hesitate to contact me or your Sales Representative.

Regards,

Macarena Busto
